

Bioresonance Therapy

WHY AM I SICK? WHY IS MY CHILD SICK?

The Hong Kong environment makes it a challenge to stay well. We and our children are constantly exposed to air pollution; illnesses; parasites; radiation from high-altitude flying, electrical appliances and cell phones; injuries; and emotional pressures from our work or school lives.

When overloaded with these stressors, our bodies' ability to detoxify can be compromised. We feel constantly tired, are prone to repeated infections and take longer than we 'should' to recover.

HELP IS ON THE WAY

The Body Group is offering treatments with the latest Bioresonance therapy. This strengthens the body's power to detoxify at the same time as reducing its workload by treating allergies, infections, scars, cranial and spinal trauma and other blockages that impair healing.

WHAT DOES THIS MEAN TO YOU?

It means getting measurable results so that your body can heal the way it was meant to do naturally.

Bioresonance assists the body by boosting the healing signals that pass between the immune system and all cells in the body, while suppressing the signals given off by allergens and other stressors.

This ability to read the body's energy is specific to bioresonance treatment, offering **FASTER RESULTS** by restoring the body's ability to heal itself.

HOW DOES IT DO THIS?

Albert Einstein and Max Planck, the father of quantum theory taught us that all matter is made up of energy and all living beings have energy coming out from every cell, organ and system in the body.

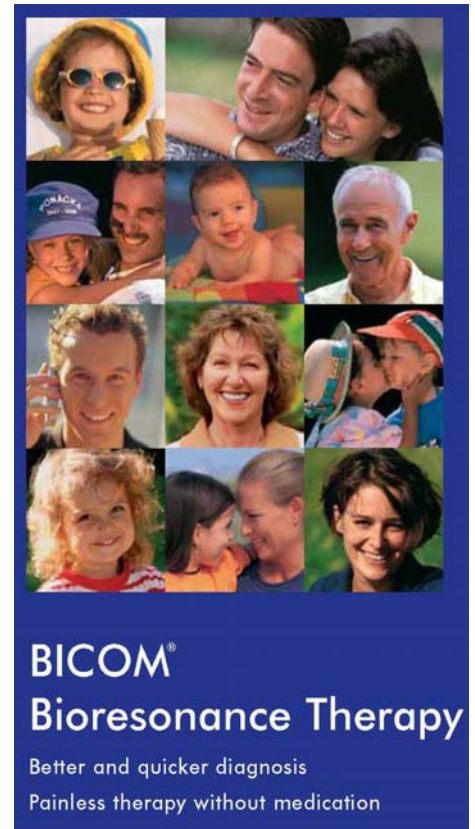

Our environment also has energy; some are good for us like walking barefoot on the grass or beach and being in nature, some are harmful like mobile phones, microwaves and high altitude flying. Even virus and bacteria, parasites and allergies carry a charge. The Bicom Optima reads the good energy waves and gives it a boost to speed up the body's ability to heal. The Bicom Optima reads the negative energy and inverts the signal to cancel it out, like noise cancelling headphones. The Optima does not heal the body. Nothing can duplicate this ability we are all born with. The Optima removes blockages (negative energy) and amplifies what is already working for us.

Recommendation by Dr Louise Porter

(PhD, MA (Hons), MGiftedEd, DipEd, BA, BIntStuds, Child psychologist)

I am excited that Bioresonance treatment offers efficient relief for so many clients, but particularly children. Food intolerances, infections and other health issues can lead to an accumulation of toxins, even at an early age. When these toxins cross the blood-brain barrier, they act as irritants to the brains. Given that the brain's only functions are to think, feel and behave, an irritated brain may think morbidly, feel emotionally and behave erratically. This treatment, then, can improve children's physical and emotional wellbeing, thus providing relief to parents and enhancing family life.
